-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-25 and 38-47, drawn to an evacuation and product dispensing system, classified in class 53, subclass 79.
  - II. Claims 26-27, drawn to a package carrier, classified in class 53, subclass 290.
  - III. Claims 28-29, drawn to a process of calibrating a drive bay, classified in class 53, subclass 393.
  - IV. Claims 30-33 and 36-37, drawn to a process of evacuating a product package, classified in class 53, subclass 84.
  - V. Claims 34-35, drawn to a process of eliminating an unrecoverable portion of a product package, classified in class 53, subclass 86.
  - VI. Claims 48-49, drawn to a process of delivering product to a device, classified in class 53, subclass 393.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a package carrier used in an evacuation system. See MPEP § 806.05(d).
3. Inventions III,IV,V,VI and I,II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced

Art Unit: 3721

by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as an apparatus not having a drive bay or an apparatus having a product dispenser.

4. Inventions III, IV, V and VI are unrelated or distinct. Inventions are unrelated or distinct if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different invention of Group VI rely upon particular subject matter for patentability which are not set forth in Groups III, IV and V such as delivering product to a primary device.

The different invention Group III rely upon particular subject matter for patentability which are not set forth in Groups IV, V and VI such as a calibration step.

The different invention Group IV rely upon particular subject matter for patentability which are not set forth in Groups V, VI and III such as forcing product toward a package outlet.

The different invention Group V rely upon particular subject matter for patentability which are not set forth in Groups II, IV and VI such as inserting a product package into the support of a package carrier.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3721

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
